

Stephen studied dental technology at Southern California College of Medical and Dental Careers and graduated in 1973. Soon after he joined with Jim Glidewell Laboratories and became senior ceramist and general manger for two of his laboratories, El Toro Dental Ceramics and later Cal-West Dental Ceramics. In 1980 Stephen became a National Board Certified Dental Technician in Ceramics. With his growing interest and attention to premium esthetics and quality, he opened his own laboratory in 1983 which continues today.

Personal Philosophy: As a Certified Dental Technician with 41 years' experience, I have seen how dental technological improvements have advanced quality. The demanding nature of my specialties -- esthetic anterior restorations and implants -- have shaped my philosophy and perspective on dental restorative quality. This perspective influences my quest, for premium techniques and materials and their implementation in cooperative efforts with the dentist, to realize premium patient care.
